

Reel handler

The Reel handler is used for handling reels with 3" (76 mm) core, commonly stretch film to be loaded into machines. The reel can be picked up directly from the floor or a pallet and then be rotated 90°. The tool is equipped with a security clutch preventing the reel from being dropped accidentally. Depending on Work Positioner the tool handles weights up to 40 kg.

Accessories - Work Positioners

To gain the full value of our Work Positioner a wide range of accessories is available. On this page there are illustrations of the most common accessories that we can equip our WP-trolleys with.
